

Press Release: AGM Product Announcement for R-Win I/O

The Jordan Valley, December 2014

AGM provides solutions for **Economic Asset Optimization** projects for SCADA/DCS networks and has over 30 years of experience working with **Water, Wastewater, Oil & Gas, and Power Sub-stations.**

AGM has developed and implemented **R-Win I/O**, an “intelligent agent” installed at remote pumping stations. Upgrade effect is similar to the PC revolution a generation ago, when “dumb terminals” were replaced by “intelligent desktop units.”

Key features include:

- Communication resilience using wireless MESH
- 16 on-board I/Os and transceiver
- Modern data security
- Enhances system performance without interfering with SCADA center
- Remote field stations can manage other local stations
- Complies with new EU and US regulations
