

Company profile

AGM is a provider of **communication & control** solutions for SCADA / DCS systems.

We offer solutions in the areas of: **Water / Wastewater, Energy, Oil & Gas, Industrial applications, Environmental telemetry, Power Sub-stations, Mining and Irrigation.**

Israel-based AGM is a global innovator in Distributed Control Networking, offering unique solutions for;

- Utilities Asset Optimization
- Economical upgrade and retrofit of old utilities networks
- Integration of Preventive Maintenance with Small Works upgrade

AGM established in 1996 by experienced people, 30 years in the fields of distributed control applications design and implementation, from concept to service.

Year of establishment: 1996

No. of employees: 7

Background of the company

AGM established in 1996 by experienced people, 30 years in the fields of communication for distributed control applications design, implementation and support.

Examples of projects

- Asset Optimization for a leading regional utility (water and wastewater)
- Expanding Environment Monitoring And Control systems
- National oil pipe real-time monitoring
- Oil leak detection
- Upgrading Water Management System
- Design of a national utility upgrade solution

AGM has projects in Israel, Peru, Mexico, France and the former USSR.

Technologies & products

- **R-Win** - Radio Wireless Internet Networking – new, original product line. Compact, smart, wireless data communication manager over RF and Cellular media, linking remote sites to the control center and the Internet, implementing bridge-relay-S&F capabilities, featuring safer wireless **MESH** networking.
- Responding to the global economic crisis, AGM developed expertise in upgrade and **optimization** projects for municipal and private utility distributed control management systems. We emphasize a **COTS** (Commercial Off the Shelf) approach and new wireless communication safety features.
- AGM is working with a GE subsidiary to improve the **Oil Spill Detector** integrated solution, it has already installed throughout the world.

Objectives / Target companies

We are seeking business partners abroad and, are looking for Solution Providers & SCADA Integrators, ready to add AGM knowledge to their solutions and projects.

Our previous international experience has shown us that distance is not an obstacle.
